2009 Rates

INSIDE CITY

WATER BASE CHARGE (Residential and Commercial - Includes *No Usage*)

5/8" METER \$7.27

3/4" METER \$7.32

1" METER \$7.52

2" METER \$8.50

BLOCK 1 \$1.17 PER 1,000 GALLONS (0-110% of AWC)

BLOCK 2 \$4.45 PER 1,000 GALLONS (the next 200% of AWC)

BLOCK 3 \$6.69 PER 1,000 GALLONS (in excess of 310%)

OUTSIDE CITY

WATER BASE CHARGES (Residential and Commercial – Includes *No Usage*)

5/8" METER \$11.63

3/4" METER \$11.71

1" METER \$12.03

2" METER \$13.60

BLOCK 1 \$1.87 PER 1,000 GALLONS (0-110% of AWC)

BLOCK 2 \$7.12 PER 1,000 GALLONS (the next 200% of AWC)

BLOCK 3 \$10.69 PER 1,000 GALLONS (in excess of 310%)

INSIDE CITY

SEWER BASE CHARGES (Includes no consumption)

5/8" METER \$4.11

3/4" METER \$4.50

1" METER \$5.70

2" METER \$11.87

CONSUMPTION @ \$1.98 PER 1,000 GALLONS (Commercial – Per Actual Usage)

CONSUMPTION @ \$1.98 PER 1,000 GALLONS (Residential – 3,000 gallon minimum up to AWC)

OUTSIDE CITY

SEWER BASE CHARGES (Includes *No Consumption*)

5/8" METER \$6.58

3/4" METER \$7.19

1" METER \$9.13

2" METER \$19.00

CONSUMPTION @ \$3.16 PER 1,000 GALLONS (Commercial – Per Actual Usage)

CONSUMPTION @ \$3.16 PER 1,000 GALLONS (Residential – 3,000 gallon minimum up to AWC)

2009 Rates (continued)

**COMMERCIAL STORMWATER CHARGE is \$2.00 per Equivalent Residential Unit
(ERU = 2,139 sq ft of impervious area)**

FLAT RATE WATER = \$14.74 (not metered)

FLAT RATE SEWER INSIDE CITY = \$17.91 (not metered)

FLAT RATE SEWER OUTSIDE CITY = \$28.64 (not metered)

SUNVIEW RESIDENTIAL SEWER FLAT RATE = \$8.00

**OAKLAWN SEWER RATE = \$16.23 for the first 3,000 gallons and \$3.30 for each
additional 1,000 gallons used. Call Oaklawn Improvement District at 1-316-524-0281
with inquiries**

**ANDOVER SURCHARGE = \$1.35 base includes the first 3,000 gallons. Each additional
1,000 gallons is \$0.20 per**

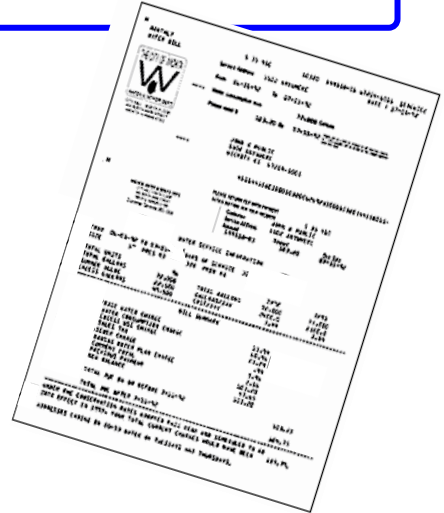

HOW TO CALCULATE YOUR WATER UTILITIES BILL

You will need to know the following:

1. Meter Size
2. Inside or Outside the City of Wichita
3. Commercial or Residential Customer
4. Average Winter Consumption (AWC)
5. Consumption

For this calculation example, use the following information:

1. 1" meter
2. Inside of City of Wichita
3. Residential
4. AWC = 8 units (6000 gallons)
5. Consumption 30 units
6. 28 to 32 day standard billing period (AWC is pro-rated for non standard billing periods)

There is a **Base Charge** for service availability for **Water**, based on the meter size and whether the service is inside or outside the city (*refer to your current year rate list*).

For this example: customer John Doe has a consumption of 30 units.
(1 unit = 750 gallons / 30 units x 750 gallons = 22,500 gallons)

Wichita Water Utilities has a 3-block conservation rate structure. The rate structure is based on AWC. AWC is recalculated every year during the winter months of DEC/JAN/FEB/MAR.

1st Rate Block is all of the water used within 110% of AWC

$$\begin{aligned} \text{AWC} &= 8 \text{ units} \times 750 = 6,000 \times 110\% = 6,600 \\ 6,600 \times 1.17/1,000 &= \mathbf{\$7.72} \end{aligned}$$

2nd Rate Block is the water used between 111% and 310% (use 200%) of AWC

$$\begin{aligned} \text{AWC} &= 8 \text{ units} \times 750 = 6,000 \times 200\% = 12,000 \\ 12,000 \times 4.45/1,000 &= \mathbf{\$53.40} \end{aligned}$$

3rd Rate Block is all of the water used in excess of 310% of AWC

Example Equation:

$$\begin{aligned} 30 \text{ units} \times 750 \text{ gallons} &= 22,500 \text{ gallons used} \\ 1'' \text{ meter base charge} &= \mathbf{\$7.52} \\ 1^{\text{st}} \text{ Block} - 6,600 \times 1.17/1,000 &= \mathbf{\$7.72} \\ 2^{\text{nd}} \text{ Block} - 12,000 \times 4.45/1,000 &= \mathbf{\$53.40} \\ 3^{\text{rd}} \text{ Block} - 3,900 \times 6.69/1,000 &= \mathbf{\$26.09} \\ \text{Total} &= \mathbf{\$94.73} \end{aligned}$$

$$\text{*Tax formula} \quad \$94.73 \times 1\% = \mathbf{\$0.95}$$

***No taxes on residential**

***Commercial taxes are calculated off of total water charges at a rate of 1% for County and 5.3% for State.**

There is a **Base Charge** for service availability for **Sewer**, based on the meter size and whether the service is inside or outside the city (*refer to your current year rate list*).

Commercial Sewer Consumption is equivalent to each month's water consumption.

Residential Sewer Consumption is calculated at no less than 4 AWC (3,000 gallons) and no higher than the customer's current AWC.

Sewer Consumption Charge is based on the **AWC** for the customer's sewer service. In this example, residential customer, John Doe, has a sewer AWC of 8 and a monthly consumption of 30 units.

Example:

Sewer Base Charge for 1" meter	=	\$5.70
Sewer AWC 8 x 750 gallons = 6,000 gallons x 1.98/1,000	=	\$11.88

Kansas Water Plan Charge is .000032 of the total consumption for the bill.

Example: 30 units x 750 gallons = 22,500 gallons x .000032 = **\$ 0.72**

Residential Storm Water Charge: property inside the city limit is charged \$2.00 per 1 ERU (Equivalent Residential Unit) regardless of size.

Example: 1 ERU x \$2.00 = **\$2.00**
